

Can I replace the router if my fiber optic cable is from a telecom company

Overview

Before purchasing a new replacement router for your cable modem, contact your ISP to inquire about any potential restrictions. Switching to Fiber optic from cable, what do I need to know?

I'm considering switching from my cable internet provider to a Fiber optic instead. I've never researched or came into contact with fiber, so one of my first questions are : Do fiber optic connections use different modems than cable?

Are. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. This guide will break down everything you. The first sign it's time to get a Wi-Fi router replacement is if your hardware is more than three years old. That's because it won't be Wi-Fi 7 compatible and is likely causing a bottleneck. You'll notice this as latency in critical apps, especially if your home is device heavy.
