

Estonia s large-span bridge

Overview

Currently, the longest-span bridges in Estonia are the Rannu-Jõesuu and Ihaste bridges, both with a maximum span of 90 meters. Additionally, the new. The Exmet Group is thrilled to announce its integral role in a significant infrastructure project - the Pärnu Bridge, which will stand as the longest bridge in Estonia, spanning approximately 270 meters. The forthcoming Pärnu Bridge boasts a span of 140 meters, serving as a testament to Estonian. The 1915 Çanakkale Bridge in Turkey, opened in 2022, has the longest central span (2,023 m) of any suspension bridge. It crosses the Dardanelles in Turkey., the length of suspended roadway. A new bridge, long awaited by locals for at least 30 years, was opened Saturday in Pärnu. The bridge connects the Rääma district with the city center and, together with the construction of adjoining streets, cost nearly €40 million.

List of longest suspension bridge spans

OverviewOther record-holding suspension bridgesSee alsoFurther readingExternal links

The world's longest suspension bridges are listed according to the length of their main span (i.e., the length of suspended roadway between the bridge's towers). The length of the main span is the most common method of comparing the sizes of suspension bridges, often correlating with the height of the towers and the engineering complexity involved in designing and constructing the bridge. If one bridge has a longer span th
