

Fiber optic cable directly connected to panel

Overview

Fiber optic patch panels are enclosures that act as a distribution hub for fiber cable. A bulk (multi-strand) fiber cable enters the patch panel and then each fiber strand is separated into individual strands or pairs of strands. These individual strands will then connect to electronic devices. I wish to connect (single mode) fibre optic cable to Fibre optic switch (DIN-rail mounted) directly without using patch panel or patch cords. In one end there is a pre-terminated subscriber wall box with two SC/PC connectors. With a range of connector options, enable efficient deployment and. Structured cabling is a standardized system to help you organize and install the cables and hardware that connect your different devices to your network (including computers, servers, cameras, or any other smart gadgets). Structured cabling uses consistent components, such as patch panels, jacks.
