

## Fiber optic cable only connects to the router for internet access

### Overview

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. In this guide, we'll walk you through how to. The process to connect fiber optic cable to router requires careful attention to detail, but I'll walk you through every critical step with the precision and clarity you deserve. You need a modem or ONT to do so. As internet speeds continue to evolve, fiber optic broadband is becoming the gold standard for ultra-fast and reliable internet connections. Fiber optics can transmit data over much longer distances compared to traditional copper cables.
