

High-density 19-inch chassis upgrade version available now

Overview

The 2U high, iConverter 19-Module managed chassis can be mounted in a 19 or 23-inch rack and features three hot-swappable redundant power supplies. Universal AC, 24VDC or 48VDC power supplies can be used in any combination. The power supplies operate in load-sharing mode. The Perle MCR1900 Media Converter Chassis is the most reliable high density modular chassis system available today. It is ideal for enterprise and campus environments where multiple points of copper and/or fiber integration are essential. An end-to-end copper to copper, copper to fiber, multimode. With its modular design, Moxa's TRC-2190 series provides 18 slots for Ethernet-to-fiber management slide-in modules and may be used as stand-alone devices at field sites. An enhanced management function that supports Simple Network Management Protocol (SNMP) allows users to remotely monitor end. TPS develops custom 19" power cabinet solutions for high-density integration of programmable power supplies and industrial control systems. The focus of this category is on configurable cabinet architecture rather than fixed standard enclosures. Packaging solutions engineered using modular design methodology providing countless combinations of card slot count, backplane architecture, power, cooling, height. Across broadcast, music, telecoms, and military applications, our 19" chassis solutions simplify the storage and transport of sensitive electronic equipment. Our range of 19-inch rack chassis is designed to. The FiberHome AN5516 series, specifically the AN5516-01 (often deployed as the AN5116-06B configuration depending on regional SKU designations), is recognized for its uncompromising high-density design tailored for standard telecommunications environments.
