

How much does it cost to set up a company network cabinet

Overview

The cost of setting up a small business network ranges from \$5,000 to \$15,000 for most organizations with 10-50 employees, depending on hardware selection, security requirements, and infrastructure complexity. This significant investment encompasses essential hardware, professional installation. The cost of your network setup will vary based on your space and the total number of users and connected devices. This guide covers typical price ranges for small business network setup, enterprise Wi-Fi, VPN configuration, and structured cabling — so you can plan your budget and post a job. And if you're planning your small business network setup this year, the cost depends on far more than buying “a couple of routers.” This guide breaks down every component, the real cost ranges, and what matters most if you want speed, security, and scalability without burning your IT budget. Let's.

Professional network cabling in 2026 typically costs \$150-\$250 per commercial Cat6 drop, \$200-\$350+ per harder Cat6A commercial drop, and \$200-\$400 for isolated finished-wall additions where minimum service-call labor dominates. Open-wall pre-wire lowers the per-drop cost. Finished-wall retrofits. The good news is that network cabinet prices range from as low as \$100 for basic wall-mounted units to over \$3,000 for specialized outdoor models.
