I'm planning on changing the light fixtures in my ceilings to LED ones. The ceiling rose looks quite simple (nothing in the loop, just single Live, Earth, and Neutral wires). Never test switch continuity while it's connected to live voltage unless you're measuring AC. If the reading does not change when toggled, the switch is likely faulty. Move the micro:bit so you can see its display easily, and press button B to see the light level reading.
