

How wide is a 19-inch chassis

Overview

Most engineering-grade equipment, as well as servers, have a panel width of 19 inches (482.6mm) and mounting hole spacing of 456mm. The 19-inch width standard is the international width standard. The 19 inch dimension includes the edges or ears that protrude from each side of the equipment, allowing the module to be fastened. A 19-inch rack is a globally standardized frame used for mounting servers, network equipment, industrial controls, and audiovisual equipment. Steel chassis offer maximum strength and EMC shielding, ideal for industrial environments. LANDE SAFEBOX SERIES WALL RACK CABINET 600x450mm. LANDE SAFEBOX SERIES WALL RACK CABINET 600x600mm.
