

Huawei E6616 Fiber Optic Sensing Device

Overview

The Huawei E6616 TMB1SL16S can realize the reception and transmission of 1 channel STM-16 optical signals. With this single board, the TMB1SL16S sends the received optical signal to the cross side after O/E conversion, while the electrical signal on the cross side is sent out after. OptiXtrans E6616 V100R022C10: Access product manuals, HedEx documents, product images and visio stencils. Based on the MS-OTN architecture, the highly integrated optical-electrical convergence platform supports access of PCM, PDH, SDH, PKT and OTN services. With powerful unified cross-connect capabilities, the platform implements integrated multi-service bearing. MS-OTN equipment supporting OTN and TDM services and a unified-switching architecture. We conducted all tests in the Huawei lab in Cheng Du, Berlin, in December 2020. Huawei OptiX OSN 1800V Pro is a product of the same brand.
