

Instructions for Use of Temporary Distribution Box

Overview

First of all, the construction distribution box should be placed in dry, ventilated and normal temperature places, pay attention to avoid harmful media such as smoke, steam, etc., no sundries can be accumulated around, and the place should be protected from bumping . Page 1 CEP temporary power distribution units equipped LET CAUTION PREVAIL with GFCI products will protect you from The CEP temporary power distribution unit is electrocution hazards resulting from ground designed to be used on a grounded electrical faults. Ground faults are current leaks and can. ELECTRICITY IS DANGEROUS. EVEN WHEN SAFETY DEVICES ARE PRESENT, HANDLE WITH CARE AND USE REASONABLE CAUTION. It will not operate when supplied from a power source which is not grounded. WARNING: TO AVOID FIRE, SHOCK OR DEATH; UNPLUG CORD and TURN OFF POWER at circuit breaker or fuse and test that power is off before installing, removing or servicing device! Remove Tightening nut from bushing. To help us meet this commitment, we organize our sustainability strategy around five core tenets: Growing Green, Living Well, Giving Back, Doing Right, and ars and beyond. Connection cables must meet NEC and local electrical codes. Use appropriate m frame via a ground lug toward the base of the frame for earth ground. Note: Disconnect. Power Tech®'s Temporary Power Distribution Box is used by contractors on jobsites (indoor or outdoor) to provide and distribute power from temporary power poles or jobsite generators. Our box is ETL approved for indoor and outdoor use.
