

Iron Tower AC Distribution Box

Overview

380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. 380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. Our mission is to meet customer's expectations by providing satisfaction through cost, quality, service, delivery and continuous improvement. ABB Mini Center Compact distribution board is the basis for development and growth in meeting all the demands for a successful future in residential. A reliable and safe electrical supply is an absolute "must" on board every ship. The safe supply from multiple sources such as shore power, generator and inverter to each of the electrical consumers is controlled and the unit functions as the central location for circuit breakers within the AC. Our AC distribution boxes are equipped with the true AC breaker and AC SPD from 220V-400V. Within a durable PC enclosure, we pre-assemble reliable AC components to reduce working time and error susceptibility, thereby improving the system operations of your end-users significantly. The Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role. Together, they make sure the electrical power distribution box works well and safely. Smart DB boxes have extra parts like energy monitoring units and communication modules.
