

Is it okay to go near the distribution box

Overview

Parking next to a distribution box is generally safe, but it's advisable to maintain a certain distance. The distribution box poses no harm to the vehicle, but it may emit some radiation to humans, as it mainly contains switches (or electric meters) rather than a power generation device. So, here at Rubber Box, we're here to list. The following are some key steps and considerations to confirm whether the installation location of the box is reasonable. Check the safety of the installation location Away from moisture and corrosive environment The installation location should be away from moisture sources and corrosive. What's safe in terms of distance with respect to the magnetic fields produced by these towers?

Thanks so much! It is always best to get a qualified electrician to perform any electrical work you may need. It takes the incoming power and safely distributes it to different circuits throughout your building.
