

KVM switcher has no display

Overview

In single monitor setups, display issues like “KVM not detecting second monitor” can occur due to incorrect connections or incompatible adapters. Verify that the correct video input is used and that the adapter matches your system, whether you're using USB-C, HDMI, or DisplayPort. USB-C, DisplayPort, and VGA adapters require careful compatibility checks for optimal performance. Avico's 2x2 Dual. Problem 3: The KVM switch is on but nothing shows on the display or it shows “no signal”. Problem 5: The output resolution is not right using the KVM switch. The. I'm trying to connect a Fujitsu FD-1008AT to my server but I am having some issues. Mainly whenever I power on the KVM it doesn't actually display an image. It only says "No Sync Signal See User's Manual".
