

Low-voltage switchgear enclosure report

Overview

The IEC has recently published a new commented version (CMV) of IEC 62208, which provides general requirements for empty enclosures used in low-voltage switchgear and controlgear assemblies. IEC 62208:2023 CMV allows the user to identify the changes made to the previous IEC 62208, edition 2. This specification defines low voltage metal-enclosed switchgear assemblies utilizing ABB MNS-SG Low Voltage Metal-Enclosed Draw-out Switchgear Assemblies constructed to ANSI C37. Circuit breakers shall be draw-out type ABB Emax circuit breakers with ABB. When designing low-voltage switchgear, many manufacturers follow guidelines from standards to create and market a product that meets all necessary requirements and ensures safety. The main standards and regulations used by manufacturers in their projects are: - LVD 2014/35 EU Low Voltage Directive.
