

OEM Fiber Optic Enterprise Router 400G

Overview

The 400G QSFP-DD ER4 module from ETU-Link Technology Co. is an essential solution for B2B purchasers in need of reliable, high-speed connectivity. For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive applications. Universal Leaf & Spine Modular Spine High Network Radix Fixed Leaf & Spine for High. Qualified for use across Juniper's 400GbE-capable ACX, MX, PTX, and QFX product families, Juniper offers a broad portfolio of 400G coherent and direct-detect optical transceivers to address the growing demand for bandwidth in metro, edge, core, and data center networks. All Juniper qualified 400G. Rapid advances in silicon are fueling a new generation of pluggable coherent 400G router optics that open exciting new avenues for rethinking IP-optical network designs. This white paper takes a closer look at these technology advances, and their impact and applications. Cisco 400G QSFP-DD High-Power (Bright) Optical module is mechanically. Eoptolink is producing full range of OSFP (Octal Small Form Factor Pluggable) a new pluggable form factor with eight high speed electrical lanes that will initially support 400 Gbps (8x50G or 4x100G). It is slightly wider and deeper than the QSFP-DD but it still supports 32 OSFP ports per 1U front.
