

Pricing for fiber optic cable laying in tunnels

Overview

The cost to install fiber optic cable ranges from \$1.50 to \$42 per foot, with installation costs accounting for 60-80% of total project expenses. According to the Fiber Broadband Association's 2025 report, median costs are \$8 per foot for aerial builds and \$18 per foot for underground projects. The initial cost of installing fiber optic cables can vary depending on the chosen installation method and specific project requirements. Total Project Costs: For commercial installations, expect costs ranging from \$5,000 to \$20,000 per mile for underground projects and from \$40,000 to \$60,000 per mile for aerial projects. Buyers typically pay for fiber laying by combining material costs, labor time, and permitting plus trenching or aerial support fees. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. This breakdown gives you real numbers to build better estimates. However, compared with aerial fiber networks, underground deployment typically requires higher upfront investment because of excavation work, cable protection. Fiber-optic cable pricing depends on whether you're purchasing materials alone or including complete installation.
