

# Quotation for laying high-altitude optical cables

## Overview

The cost to install fiber optic cable ranges from \$1.50 to \$42 per foot, with installation costs accounting for 60-80% of total project expenses. In contrast to “classic” civil engineering, in which an open trench is dug and the pipes are laid at least one meter deep, alternative laying techniques require less depth – and ideally almost no large. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Whether you're wiring a single building or laying fiber across a larger property, knowing the key factors that influence the final cost will help you budget accurately and avoid surprises.
