

## Relay protection device relocation

### Overview

Develop and follow a procedure for removing and restoring the protection system. ABB has a variety of. able sources such as wind and solar. These clean energy sources, connected through inverters and flexible transmission systems, are transforming traditional grids based on synchronous generators into more flexible. cant challenges to system stability. Nowhere is that clearer than in the challenge to. R&B Switchgear Group offer a wide range of protection relay retrofit solutions, which are designed to extend asset lifecycle, whilst also improving the performance and safety of electrical switchgear through the introduction of modern day technology and enhanced features. A strong test and maintenance program will keep protective relays in a high state of readiness and help utilities avoid equipment damage and prolonged downtime.
