

San Marino Access Switch 800G

Overview

SSE-T8164 is a high radix Ethernet switch with 64 800G ports that can deliver 51. The next key development is 800G, and the industry is already gearing up to deploy this next generation of client optics in hyperscale data centers. Developments in three distinct areas are needed for 800G deployment: optical modules and direct attach copper (DAC) cables, switch ASICs, and 800GE. Designed specifically to enhance data center networks, the SSE-T8164 offers 64 ports at 800 gigabits per second. These switches ensure accelerated Ethernet connectivity across all data center environments, maintaining top-notch performance and feature richness. is dedicated to balancing technology with humanism as it pursues a company-wide commitment to become a world-class DMS that contributes to the improvement of living quality with innovative. First Stage: Introduced an 8x100G dual interface (both optical and electrical), which hit the market in 2021.
