

Sdh Huawei optical module model

Overview

1,LC) Huawei is a high-performance 10G SDH optical interface board, specifically designed for Huawei's OptiX OSN transmission platforms, including OSN3500 and OSN7500. Real-time monitoring and intelligent diagnostics on the network at every level every time, covers service, optical channel, fiber failure. To meet the growing demands of Metropolitan Area Networks (MANs), Huawei has developed the OptiX OSN 3500—next-generation intelligent optical transmission system. Primarily used at the metropolitan convergence and backbone layer, the OptiX OSN 3500 in 1. The OptiX OSN 3500 transmits voice and data services on the same platform with high efficiency. Huawei offers a comprehensive portfolio of pluggable StarryLink optical modules for data center networks, with various models providing flexible plug-and-play solutions tailored to diverse interface requirements. When working with other devices of Huawei, OSN 580 supports various networking modes, including the pure.
