

Sfpaoc optical cable

Overview

The SFP-10G-AOC SFP+ Active Optical Cable is a plug-and-play, cost-effective solution for 10Gbps connections. It uses Multi-Mode Fiber (MMF) with SFP+ connectors and has built-in optics, eliminating the need for separate transceivers and patch cables. They are compliant with SFP+ MSA, SFF-8431 and SFF-8472, and are mainly used in Telecom, Wireless, InfiniBand, and Fiber Channel. It provides a reliable and efficient way to connect active optical components (AOCs) over. 10Gtek® SFP+ Active Optical Cables are hot-swappable, low-voltage cable assemblies that connect directly into SFP+ modules at both ends. These cables use a 20-position connector with active circuitry to increase distances and to improve EMI and reduce signal loss. 5 m to 100 m, beyond the range of Direct Attach Copper Cables (DAC). It integrates an optical cable of a specified length with two optical modules to form a convenient transmission channel, and the cable length can be customized according to customer application requirements.
