

Standard Three-Level Distribution Box Construction Requirements

Overview

Specification covers the design, manufacture, testing at works and supply of Distribution Boxes made out of CRCA MS for controlling the L. 3 phase, 4 wire, 433 V, 50 HZ with effectively. Environmental safety refers to the safety requirements for the installation and operational environment of the distribution system, including three aspects: operational environment, protective environment, and maintenance environment. The requirements are as follows: (1) Protective Environment:. required. Isolator Base should withstand the breaking capacity of 80 kA. To extinguish the arc immediately in iso ators, in each phase arc-chutes with minimum 12 strips ype. Ensure safe placement: install in. Design requirements for low voltage distribution boxes cover NEC, IEC, and safety standards to ensure reliable, compliant electrical installations.
