

Swedish CE certified single-fiber bidirectional 800G

Overview

The STC-800G-2xDR4 OSFP112 is an advanced optical transceiver module designed for high-capacity short-reach data center and hyperscale environments. Key. The Cisco ® OSFP 800G transceiver modules provide 800 Gigabit Ethernet (GE), 2x 400GE, 4x 200GE, and 8x 100GE connectivity options, complying with the Octal Small Form Factor Pluggable (OSFP) MSA for pluggable transceivers. The modules comply with the OSFP MSA configuration with integrated closed. Thus, according to the single-channel rate, 800G transceivers can be broadly classified into two categories: single-channel 100G and 200G. The figure below displays the matching architectures. Single-channel 100G optical modules can be implemented relatively quickly, while 200G optical modules have. Eoptolink OSFP 800G transceivers are compliant to the latest releases of the OSFP MSA.
