

The cable is a bit thick and goes into the distribution box

Overview

The electrical power supply comes from the network to the building through the main feeding cable. Which - from others here comes in various lengths. But before the installer arrives you don't really know how far they would be prepared to run it. They function as junction points that manage, protect, terminate, and distribute fiber optic cables, ensuring efficient data transmission between different network elements. FDBs play a pivotal role in maintaining signal integrity over long distances, offering a centralized location for splicing. It is important to use the correct cable thickness in a system. Loose Tubes. What is this box connected to the modem?

Basically, this is how the wiring connection goes: ISP --> That box inside the orange circle in the picture -- > Modem Does anyone know what is that and its purpose?

OTO.
