

## Using H3C 10 Gigabit Optical Modules

### Overview

This guide provides a comprehensive overview of SFP-XG-LX-SM1310 compatibility with H3C devices, including technical specifications, deployment considerations, verification methods, and best practices for integrating this module into enterprise networks. The Ministry of Industry and Information Technology has clearly stated in the issued Dual-Gigabit Network Collaborative Development Action Plan (2021-2023) that China aims to build a dual-Gigabit network infrastructure that will cover all urban areas and eligible towns within three years, thereby. The SFP-XG-LX-SM1310 optical transceiver has emerged as a popular choice for 10G single-mode applications, offering long-distance transmission capabilities and consistent performance. For organizations using H3C switches and routers, ensuring compatibility with this module is critical to. The following uses the Moduletek QSFP-40G-LR4 module connected to an H3C S6820 switch as an example to introduce how to read information of the connected optical module on an H3C switch. Figure 1 Schematic Diagram of Optical Module Connected to Switch 1. Check Optical Module Status Run the. Then select two H3C full gigabit switches to build a gigabit network and enjoy games, 4k movies and other service experiences. 953Gbps (10GBASE-LW) over single mode optical fiber. The SFP+ transceiver module fully complies with SFP+ Multi-Source Agreement (MSA) standards. The H3C 10G series optical modules use advanced technology, with the characteristics of low power consumption, high-speed transmission, hot-swappable support, and low cost, to meet the urgent needs of modern networks for stable and efficient data transmission.
