

Using an old-fashioned router with gigabit fiber optic cable

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Most modern Wi-Fi 6 routers will work, but checking for “fiber ready” specifications ensures you can handle symmetrical speeds. of the router?

Geben Sie Ihren Kommentar ein. This comprehensive guide combines industry. My local internet providers, Indiehome, uses a fiber optic cable and they gave us a free Huawei router, they said it was their standard. But that router kinda have a low security (people can change the access the wifi security since the password and username cannot be changed) and has no ability to.
