

What size clip should be used for outdoor butterfly-shaped optical cables

Overview

Use saddle clips sized to the cable width. The slotted groove design on most butterfly cables is there to make stripping fast — use a dedicated drop cable stripper, not a generic wire cutter. Nicking the fiber coating adds loss at every nick. These clamps provide a secure foundation for the cables, helping to prevent damage and maintain proper alignment and. Cable clips are a handy way of securing longer runs of cabling and wiring to walls, furniture, along skirting, or behind/around other fittings and fixtures. They're very widely used in both home and workplace settings, and indeed anywhere you're likely to find lengths of wire running between. Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. Always measure cable diameters for proper fit and choose the right material for durability. The CMS011 Zip-Tie-Style Cable Ties (supplied in bags of 100) are releasable and are typically.
