

What type of corrugated tubing is used for fiber optic cables

Overview

Two-Inch split tube, often called corrugated tubing, is used for vertical cable management, typically directly into cabinets or network racks. The flexible tube is split down one side for easy installation and access to fiber optic cables. Even though these are usually rigid materials, convoluted plastic tubing becomes flexible. Two-Inch Flexible Tubing from Amphenol Network Solutions provides a simple and inexpensive way to organize and bundle your fiber cables. Premier Plenum meets UL-(910) standards for the National Electrical Code, Article 770, and satisfies UL-2024 standards for low smoke and flame. Conduits act as protective channels that house fiber optic cables, safeguarding them against external threats such as moisture, excessive heat, pressure, and UV exposure. With these assemblies we mention in this article, the widest point of.
