

## Which cable should the fiber optic router be plugged into

### Overview

First, plug one end of the fiber optic cable into the transceiver and the other end into the fiber optic network. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled. High-Quality Ethernet Cable: A Cat6a or higher cable is essential for maintaining optimal speeds between your ONT and router. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. It's meant to connect to an ONT or ONR from your wall. You can't 'really' connect it directly to a random consumer router in most cases - it's meant to go into an optical fibre device. Your internet service provider (ISP) usually supplies this. Here's a simple guide to help you through the process: 1.
